

Vivek Patil

Pune, Maharashtra, India

Contact: 7249099856 | vivekpatil1357@gmail.com | LinkedIn | GitHub | Leetcode

Education

RMD Sinhgad School of Engineering, Pune

Aug 2024 - May 2027

B.E. in Computer Engineering

CGPA: 9.13

KCE's College of Engineering, Jalgaon

Jun 2021 - May 2024

Diploma in Computer Engineering

Percentage: 89.88%

Skills and Abilities

- **Programming Languages:** C++, Java, Python, JavaScript.
- **Frameworks and Libraries:** React.js, Next.js, Express.js, Node.js.
- **Databases:** MongoDB, MySQL, PostgreSQL.
- **AWS Services:** EC2, DynamoDB, RDS, S3, ELB, ASG, SQS, SNS, Cloudfront, Lightsail.
- **Others:** Data Structures and Algorithms (500+ Leetcode), Redis, Docker, Github Actions, CI/CD.

Achievements and Extracurricular activities

- Led the organizing team of an Inter-College Hackathon.
- Awarded Best Trainee at Sumago Infotech (2023).
- Winner of Zonal Level Inter-College Cricket Tournament (2024)
- Winner of Codechef 2025, RMD SSOE, Warje
- Runner-ups in Avishkar SPPU Poster presentation Competition (2026)

Positions of Responsibility

- Head of TECH CLUB, RMD SSOE, Warje

Experience

Veltos AI | Software Developer Intern | Platform Link

Jun 2025 - Present

- Led end-to-end development of Veltos.ai, designing **NestJS** backend services, **DynamoDB** schemas, **S3** storage, authentication, **WebSockets**, and AWS infrastructure for a production platform.
- Migrated the backend from **Next.js** to NestJS and implemented persistent client-backend WebSocket communication with ping-pong heartbeats for connection health and reconnection handling.
- Designed a patch-based game **versioning system**, storing incremental changes instead of complete game snapshots, significantly reducing storage and payload overhead while supporting game version management and publishing.
- Implemented **concurrency-safe** subscription credit allocation, preventing duplicate or inconsistent credit grants during simultaneous active/renewal operations.
- Built a Redis-buffered Gamezone view counter with atomic operations and scheduled DynamoDB synchronization, reducing database write amplification and maintaining accurate counts under concurrent updates.
- Developed guest-to-user leaderboard migration, persisting anonymous scores against secure guest identifiers and automatically synchronizing them after authentication without trusting client-submitted scores.
- Built artifact-based GitHub Actions CI/CD with automated deployment to AWS Lightsail, configuring Nginx, Let's Encrypt TLS, and PM2 for production process management.
- Engineered game publishing, moderation, resource management, payment/subscription workflows, and performance optimizations including Redis caching, pagination, lazy loading, and SSR/CSR tuning.

Sumago Infotech Pvt. Ltd. | Python Django Trainee

Jun 2023 - Aug 2023

- Worked on **Django** while learning full-stack development.
- Gained experience in REST APIs, models and frontend-backend integration.

Projects

E-Commerce Platform for Clothing Brand | Next.js, AWS S3, Razorpay | noorviclothing.com

- Designed, developed and deployed a production-grade e-commerce platform for a live fashion brand (noorviclothing.com) using Next.js deployed on Vercel with Cloudflare CDN, DNS, and caching, ensuring global low-latency content delivery.
- Designed a scalable architecture leveraging Redis for high-speed caching, and Neon PostgreSQL with Prisma ORM for optimized and reliable relational data management.
- Implemented cost-efficient S3 object storage with CDN-backed static delivery, built a complete admin panel for product and order management, and optimized media loading (preview GIFs, video poster fallback, lazy-loaded videos) to enhance performance under high traffic.

Personal Virtual Assistant for PC | Electron.js, Flask, Gemini API | Github Link

- Created an AI assistant with song playback, news, and weather, along with code error resolution.
- Designed a cross-platform desktop app with **Electron.js** and **Flask**
- Added Gemini API (by Google) for live Q&A, news, weather, and music integration.

Certifications

- Data Structures and Algorithms in python (NPTEL).
- Actively preparing for **AWS Certified Solutions Architect - Associate**, expected completion by December 2026
